

McGill University – Postdoctoral Position in HIV Stigma and Discrimination
Dept of Epidemiology & Biostatistics | School of Population and Global Health
Term: 1 year (renewable) | **Start date:** Winter of 2025 (flexible) | **Salary:** \$70,000 CAD

About this opportunity:

We are seeking a highly motivated **Postdoctoral Fellow** to join a multidisciplinary research team investigating the global prevalence, trends, determinants, and impacts of HIV-related stigma and discrimination experienced by people living with HIV (PLHIV). This position offers an opportunity to contribute to innovative, policy-relevant research at the intersection of epidemiology, social sciences, statistics, and global health.

What you'll do:

- Lead innovative projects on HIV stigma and discrimination
- Design and execute systematic reviews.
- Build Bayesian meta-regression models to integrate diverse data streams.
- Collaborate with world-class researchers and international partners.
- Publish in high-impact journals and present at global conferences.

Who we are:

- We are an interdisciplinary team combining expertise in epidemiology, infectious diseases, mathematical modeling, and population health (www.matmg.com).
- Led by Mathieu Maheu-Giroux, Canada Research Chair (Tier II) in Population Health Modeling.
- We are committed to impactful research that informs policy and improves health outcomes.
- We provide a supporting environment that fosters innovation.

What we offer:

- Access to rich datasets and advanced computational resources.
- Mentorship and career development opportunities.
- Competitive salary and comprehensive benefits.

Who we are looking for:

- PhD in Epidemiology, Biostatistics, Public Health, or closely related field.
- Demonstrated expertise in evidence synthesis and systematic reviews.
- Familiarity with stigma theory, HIV, key populations, and social determinants of health preferred.
- Outstanding quantitative and analytical skills (knowledge of Bayesian statistics).
- Passion for improving health outcomes globally.

Start date: Winter 2026 (flexible).

Location: Montréal, Québec
